Skills

Javascript | Typescript | C# | NextJS | .Net Framework | PostgreSQL | ReactJS

React Native | AWS Services | Entity Framework | I18n | OpenTelemetry

Experiences

Linear Sistemas LTDA | Mid Full Stack Developer   Apr 2021 - Present

- Front-End Architecture & User Experience: Led the UI modernization by migrating a component library to TypeScript and implementing a Micro Front-End architecture with Module Federation. Optimized the build process (Webpack) and loading performance with skeleton loaders to enhance both the developer and user experience.

- Developed and optimized scalable C#/.NET microservices, implementing real-time and asynchronous communication with WebSockets and RabbitMQ while ensuring code quality with xUnit tests.

- Optimized CI/CD pipelines and Docker for automated deployments, implemented a full observability stack (Jaeger, Prometheus, Grafana), and mentored developers through pair-programming.

Education
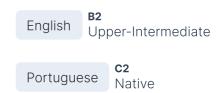

PUC MINAS
Software Engineer Postgraduate degree
2018-2023

UNIASSELVI
Systems Analysis and Development
2019 - 2021

Languages

English **B2** Upper-Intermediate

Portuguese **C2** Native

Projects

2023 MatchIn

A Booking.com style application for sports court reservations, built with a React.js/NextJS front-end and a Node.js/Fastify/Better Auth back-end, featuring payment integration with Stripe.

2025 Quadra Desenvolvimento

An urban development company website, built with Astro and Tailwind CSS.

2025 Personal Portfolio

My personal portfolio, built with Astro and Tailwind CSS.
